Tips, Tricks, and Tweaks

Offers the user a selection of features to make life a little easier. It will automate a variety of tasks to help in polishing a resume.

Quick Tagging allows for automatic tags for easier lookup by employers

Automatic Buzzwords add invisible (white-on-white) text to resumes to aid in getting resumes noticed by company search engines.

☒ Enable Tips, Tricks, and Tweaks for this resume

☐ Use Quick Tagging

Please enter your tags:

☒ Use Buzz Word Injector

Enter additional buzz words

Upper portion shows the bottom of a resume, this would be filled with data normally.

Toggles to activate various automated features.

Text boxes to upload additional tags and buzz words.

In the settings of the app, users can also upload buzz word lists and tag lists.

Goal Visualizer

A visual representation of the progress towards given goals.

The user selects from some goals (Resume completion, skill building, job requirements met, etc.).

The application overlays a progress bar to provide a reminder and encouragement for the user in seeing how far they have come and how far they have left to go.

Progress to Junior Cybersecurity officer at Apple

Job Requirements:

4+ Years of Experience

☐ <https://jobfinder.com/charlotte>

CompTIA Sec+ Certified

☐ <https://compTIA.com/enroll>

PowerShell Proficient

☒

Overlay near the top of the screen showing progress to goal (in this case, job requirements for a job at Apple).

Quick toggles or check boxes for when goals are met.

The application can present the user with links to various resources to help them get qualified faster.

Resume Generator

One of the primary functions of the application. It generates a resume based on pre-defined data given by the user.

On initial startup, the user can input prior education, employment, and other relevant information and then be presented with prebuilt resumes that can later be tailored to suit each individual.

Various layouts and schemes can be chosen from.

Name: Jonathan Doe

Prior Education: Tap here to select a school

Work Experience:

Upload Certification: Tap here to upload

Language Skills:

☒ English Native Tongue
 ☐ Spanish
 ☐ French
 ☒ Romanian Fluent

The user will be prompted to enter information like name and date of birth.

There will be drop down menus to select schools for prior education, buttons for commonly sought-after languages along with drop downs for skill level, and text boxes for work experience and soft skills along with uploads for certifications.

The next page would show pre generated resumes in a variety of themes and layouts

Other Resumes

little about the resume

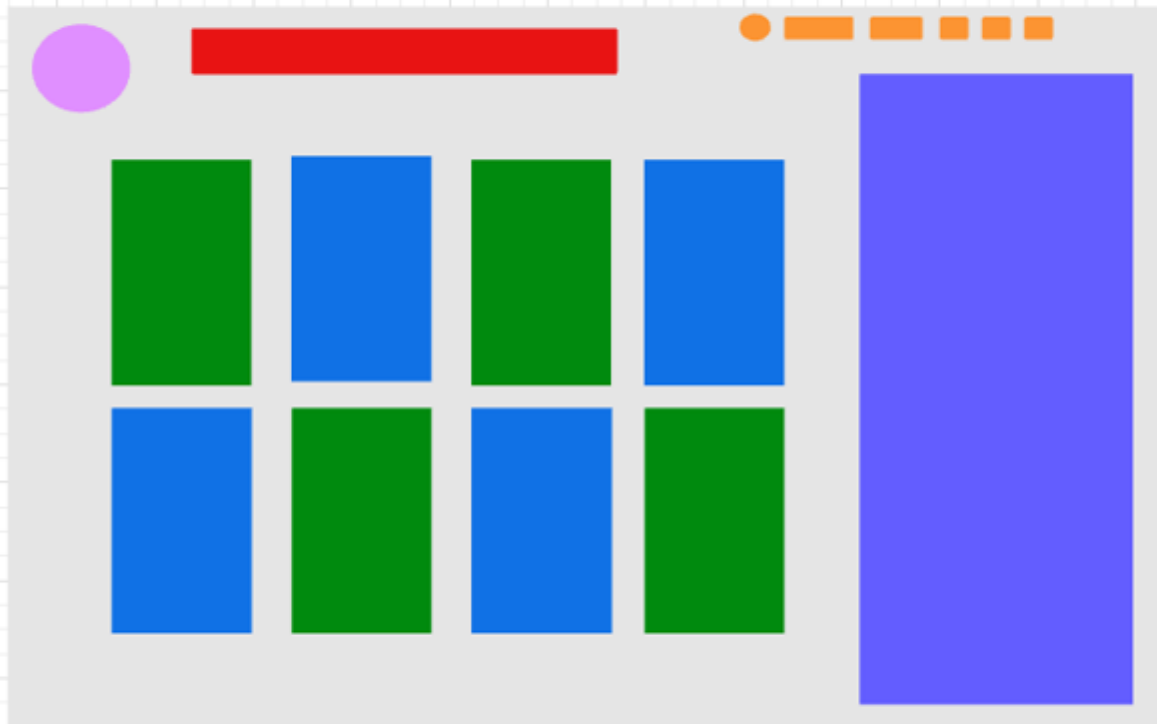

Resume finder: type what job you want and get a list of resumes of people that got that job. only resumes of people that agreed to share

search for your job and get resumes of people that have your dream job. click on the resume for more information

Solution Sketches

RESUME FINDER: The user can find resumes of people who already have deam-jobs to help the user see what kind of information they should include in their own resume.

Blue and Green: Resume's of sussceful users

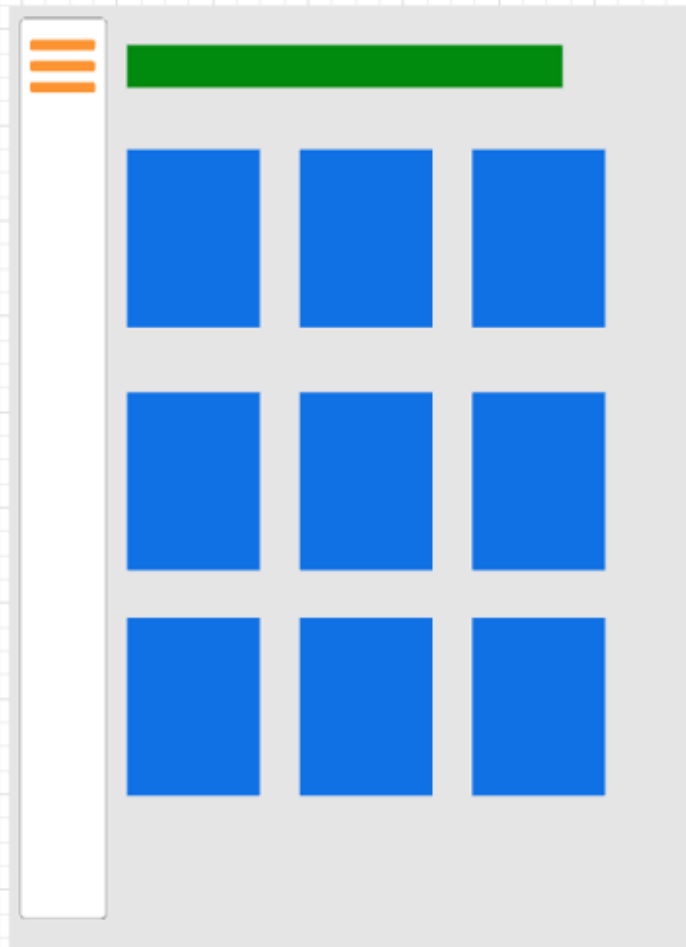

Orange: Profile, other user related settings

Purple: Preview

Pink: Logo, Home page

Red: Search Bar for resumes

RESUME FINDER: Advanced File Manegment. Import and export files. Translations.

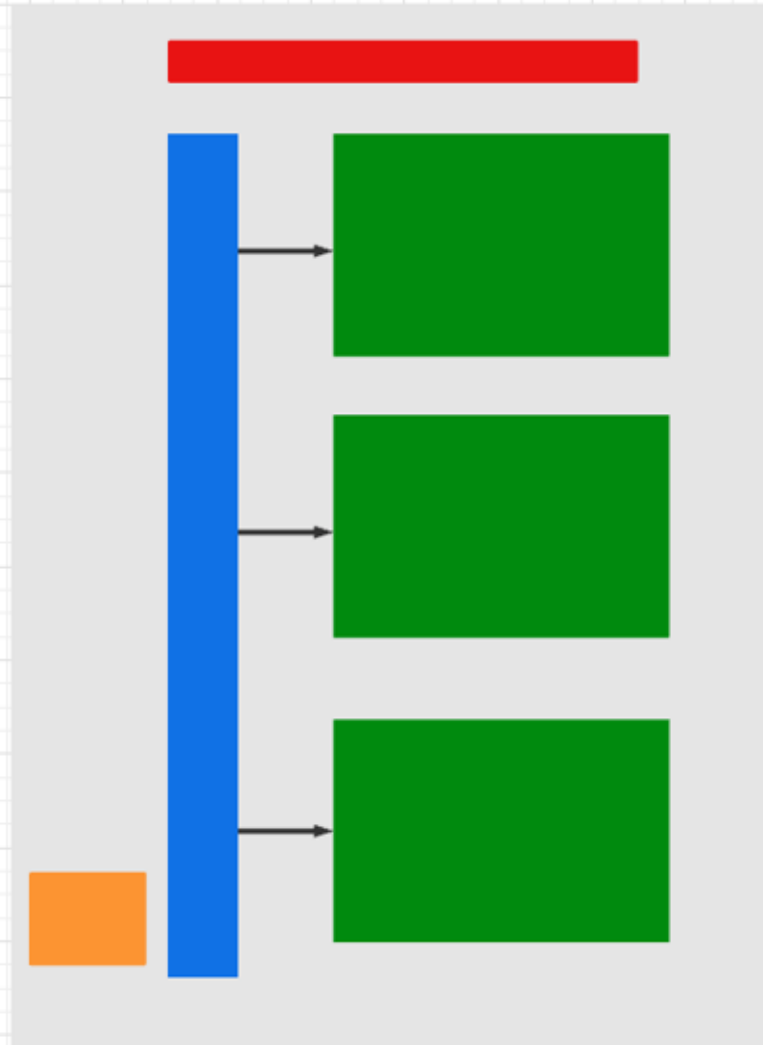

Orange: can click on to expand options

White: expands to show options like "translate", "export", "save", "import", and other functions that maybe added later

Blue: The file names and previews. Smaller frame because mobile, so files take up more screen space

Green: Search Bar for files

GOAL VISUALIZER: Progress bar to have visual representation of how close the user is to achieving their goals for obtaining requirements for a specific occupation or resume status.

Mobile App Interface

Orange: "Add Skill to Resume" Button once the requirement is achieved

Blue: The Progress Bar based on time/effort calculations

Green: Descriptions of the intervals on the bar

Red: Search Bar to look at progress on different requirement/ to switch to a different requirement
